TWO BAR MOUNTING BRACKET FOR SNOBAR AND COLORBAR

This is a 2 inch wide double-bar mounting bracket, also known as the "RC-2B Bracket". Our exclusive Double-Bar Mounts are perfect for projects that require a two bar system in their specifications. This innovative mounting system allows SnoBar/ColorBar products to be safely installed on standing seam roofs without leaks, damage, or voided warranties. Constructed from extruded aluminum and utilizing the proven power of our patented RoofClamps, these mounts can be used for new or existing roofs. Bar, RoofClamp and bar mounting fasteners are NOT included.

Disclaimer:

The SnoBar and ColorBar components are usually sold as a complete component kit or as a project designed system specified by the manufacturer or architectural engineer. It is important to follow a specifically designed spacing recommendation for your project from the manufacturer or architectural engineer. The components are not sold with the intent of building your own rail system, please see warranty below.
